

HIGHSTEP MOBILE ANCHOR POINT PRODUCT DATA SHEET

The mobile anchor point from HighStep Systems was specifically designed for safe personal fall protection and supports a holistic safety and rescue concept.

Rescue Operations

In emergency situations, the anchor point can be quickly positioned above the person requiring rescue. This allows for immediate deployment of retractable fall arrest equipment, enabling swift response to dangerous situations.

Flexible Positioning

The anchor point attaches at any position along the rail system, providing maximum flexibility for work and rescue scenarios.

Quick Locking

A single-action mechanism securely locks the anchor point in the desired position, enabling rapid deployment when needed.

Technical specifications

Maximum payload	1 person Rescue 2 persons
Weight	1070g
Inspection	Every 12 months
Approved ambient temperatures	-35°C - +60°C *
Approved humidity	0-100%

Implemented Standards

- EN 795:2012 and CEN/TS 16415:2013

Visit the website.

At temperatures below 0°C, the mobile anchor point must remain dry.
